BUILDING REGULATION SEMINAR, RESIDENTIAL FIRE SAFETY

When designing for fire safety in residential buildings, the standards most often adopted are set out in Approved Document B volume 2.

The generic solutions contained within that guidance can, at times, limit design flexibility – particularly when dealing with open plan living.

This session will look at using alternative design guidance and jhai’s professional experience to allow clients much greater flexibility, adapting the code-compliant solutions using our understanding of human behaviour in fire and potential fire severity to meet the functional Part B requirements.

Friday 7 September 2018
Pirelli Stadium, Princess Way
Burton On Trent
DE13 0AR

www.jhai.co.uk

jhai will provide Building Control for over **20,000** construction projects this year alone, helping architects, builders, developers and homeowners across England and Wales comply with Building Regulations as efficiently and as profitably as possible.
