

#### ELECTRICAL SAFETY INSTRUCTIONS (Applicable to UK Installations only)

All fittings must be installed by a competent person, in accordance with current IEE wiring regulations. If in doubt consult a qualified electrician

#### IMPORTANT

Always switch off the electrical supply at the mains during installation and maintenance. It is recommended that the fuse is withdrawn or the circuit breaker is switched off for the necessary circuit before installation commences.

Fitting in Bathrooms is subject to the appropriate zone in accordance with IEE Regulations. This product is suitable for zone 2 and outside zones. IT IS NOT suitable for installation in Zone 0 or Zone 1. It is also not suitable for installation in saunas, steam rooms or shower cubicles. This product is only suitable for permanent installation. DO NOT connect to a trailing plug and socket outlet. Although this product has an Ingress Protection rating of IP44 it is only suitable for indoor use. Do not attach the product to surfaces that are damp or otherwise electrically conductive.

#### INSTALLATION CARE & SAFETY

Wear suitable eye protection when drilling. Take care when using power tools near water - the use of a residual current device (RCD) is advised. Beware of hidden cables or pipes. Take care if drilling on tiled surfaces in case the drill slips. A piece of masking tape applied to the wall before marking out the fixing holes will stop the drill from wandering.

This product should be positioned well away from curtains and other fabrics.

This product could be dangerous and is only to be installed by a competent person.

#### CLEANING

It is recommended that the unit is cleaned with a soft, dry, non abrasive cloth when turned off. Never use cleaning agents or abrasive materials on any type of surface finish. Do not allow moisture to come into contact with the electrical components.

#### 10 YEAR GUARANTEE

We have complete confidence in this Laura Ashley product and as such it is offered with a 10-year guarantee against defects in manufacture. The guarantee requires that this product be used in the manner for which it was intended and that it is installed and maintained in accordance with the fitting instruction. The guarantee covers products in domestic use only. In the unlikely event that this product should fail during the guarantee period we will either replace the faulty part or the complete unit as appropriate. Light fittings and consumables are excluded from the guarantee but can be obtained by contacting customer services (see contact details below).

### INSTALLATION PROCEDURE - Please read instructions in their entirety before

Before installation ensure the electrical supply is turned off at the mains. It is recommended that the fuse is withdrawn or the circuit breaker is switched off for the necessary circuit before installation commences.

The wall surface must be of suitable strength and construction.

- 1) Remove the screws retaining the end plates to allow disassembly of the wall light. Keep the screws and end plates in a safe location for reassembly at a later stage.
- 2) Carefully remove the base plate to allow access to internal components and fixings
- 3) Position the base plate in the desired location checking to ensure it is level, drill holes and use suitable wall plugs and screws to fix to the wall.
- 4) Make electrical connection from the light connector box to the mains supply. Use the connection wire from your mains supply to make the necessary connections in accordance with the current IEE regulations.
- 5) Fit 300mm length 8W T5 fluorescent tube as shown.
- 6) Reassemble the light fitting by following the reverse of steps 1 and 2.
- 7) Reconnect power supply and test light fitting to ensure it is working.
