

CLEANING, SEALING & AFTERCARE

BLACKSTONE SEALER & RESTORER TECHNICAL DATA SHEET

REF: 37/5/1 JUNE 2018

LTP BLACKSTONE SEALER & RESTORER

Water-based Black Impregnating Sealer

For Exterior use

For restoring the appearance of all types of faded dark natural and artificial stone including limestone, marble, slate and concrete pavers.

Directions for use

For application and cleaning tools see LTP website.

Wear gloves and ensure that any surfaces not to be treated are covered and protected.

IMPORTANT: This product is a permanent staining solution that will darken the surface of the stone and the grout joints making it very difficult to remove once applied. Test on an inconspicuous area before general application and do not walk on treated surfaces until the solution has completely dried.

Shake bottle well before use. Apply a small amount to the surface and spread out evenly using a soft cloth or sealant applicator. **For rough cut or textured surfaces** apply with foam roller or paint brush. Allow to absorb and dry. Apply further coats at 2 hourly intervals until desired depth of colour has been achieved. Leave to dry naturally. On very porous surfaces several coats may need to be applied to achieve an even dark appearance. **(Max.4) Honed and smooth surfaces:** once dry and to ensure even application if may be necessary to work off any excess sealer using a soft cloth. Do not walk on the surface for at least 4 hours after final application. Allow newly treated surfaces to cure for 24 hours before subjecting to heavy use. Before allowing traffic gently rub the surface in a few areas with white cloth or paper towel to make sure that it is completely colourfast.

Always experiment on a trial area first to establish optimum results.

Coverage

Up to 30 sq.m per litre per coat.

Storage information

Store in a cool, dry, frost-free environment.
Shelf Life – Up to 2 years for un-opened containers.

Health, Safety & Environmental

Harmful if inhaled.

Harmful to aquatic life with long lasting effects.
