

Eliet, inventor of the mobile shredder

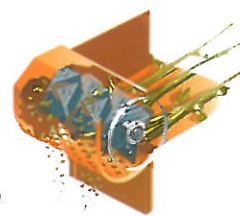

For the past ten years Eliet has revolutionized the world of chippers and shredders, with its innovative design for a mobile chipper. The genius of this concept lies in its simplicity: **"Take the machine to the wood, not the wood to the machine"**. Eliet invented the concept of the self-propelled chipper and it is still way ahead of the market. In the last few years, Eliet developed a wide range of mobile chippers and can now justifiably call itself the undisputed market leader. This revolutionary concept won a Golden Spike innovation award. The advantages of a mobile chipper are legion. The machine can be used anywhere it is needed. And that's everywhere. It's easy to transport too, because these machines have no trouble driving in and out of any van or trailer. That means unequalled time-savings and comfort.

ELIET[®]
In harmony with nature

Eliet Chopping Principle™

The blades of the Eliet shredders cut into the garden waste like miniature hatchets. As a result the wood is cut with the grain. A passel of blades repeat the cycle a thousand of times a minute. The process results in uniform chips that are perfect as a mulch layer or on your compost heap.

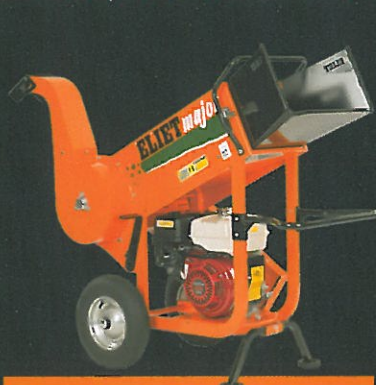

Eliet Creative Lab

Eliet is constantly working on the development of new revolutionary machines and systems and the improvement of existing machines. This constant sense for innovation has more than once been rewarded with prizes on international exhibitions.

DISCOVER OUR RANGE OF PROFESSIONAL SHREDDERS !

Eliet shredders are unique. Next to the patented Chopping Principle™ which processes uniform chips that compost quickly, these machines combine a solid structure with flexibility and compactness. By choosing for the Eliet shredders, you are going for reliability and guaranteed results, and this all custom made for the professional.

MAJOR 4S

Ø 2,2 inch chipping capacity 84 cubic feet chips/hour

PTO / 9,0 HP Honda GX270
9 HP Subaru EX27 / 10 HP B&S Vanguard

20 reversible HS steel blades

13 3/4"

Yes

Dimensions (l x w x h) 61 x 24 x 4 inch

Weight 297 lbs

PROF 5

Ø 3,2 inch chipping capacity 105 cubic feet chips/hour

13 HP Honda GX390

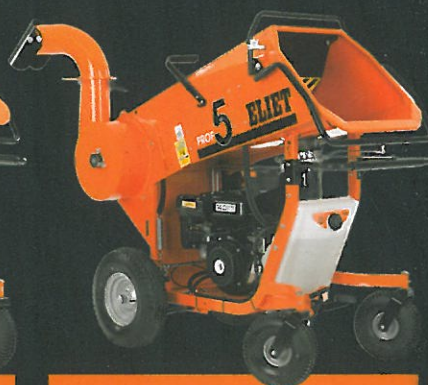

24 reversible HS steel blades

15 3/4"

No

66 x 29 x 54 inch

626 lbs

PROF 5 B

Ø 3,2 inch chipping capacity 105 cubic feet chips/hour

PTO / 14 HP Subaru EX40

24 reversible HS steel blades

15 3/4"

Yes

66 x 59 x 57 inch

714 lbs

SUPER PROF

Ø 4,7 inch chipping capacity 211 cubic feet chips/hour

18 HP B&S Vanguard

24 reversible RESIST™ blades

18 3/4"

Transmission V-belt XPB 2360

Dimensions (l x w x h) 72 x 32 x 54 mm

Weight 782 lbs

CROSS COUNTRY

Ø 4,7 inch chipping capacity 211 cubic feet chips/hour

18 HP B&S Vanguard

24 reversible RESIST™ blades

18 3/4"

Transmission V-belt XPB 2360

Dimensions (l x w x h) 72 x 35 x 52 mm

Weight 925 lbs

ULTRA PROF

Ø 5,5 inch chipping capacity 282 cubic feet chips/hour

22 HP B&S Vanguard / 24 HP Honda GX670

24 reversible RESIST™ blades

18 1/2"

Transmission 2V-belt XPB 2280/2

Dimensions (l x w x h) 81 x 35 x 55 mm

Weight 992 lbs
