# Den.

*Do you remember making a Den?*

*Was it an edifice of sofa cushions and sheets, a cardboard box castle or a tangled tepee of branches and bracken? Those small creative structures defined a private space, a quiet retreat - a place to meet with friends...*

**Den** is a range of acoustic work areas created to make public spaces private. With eight different styles, numerous configurations and a full array of accessories, everyone has the opportunity to build their ideal **Den**.

In any open plan work area there are times when you need to find your own space. The environment we work in has to facilitate both the privacy needed to concentrate and the space needed to collaborate. The workplace has evolved as new technology has changed our working habits. Large open spaces with shared working areas

create lively exciting environments, which cultivate greater collaboration. But what happens when you need a quiet area to reflect on a budget, write an essay, hold a meeting, or even talk on the phone?

When we began to talk to people, we soon realised that we needed to locate our inner child and create a **Den**.

This brochure is all about creating the most effective environment for you to work happily and efficiently. It's about building your perfect **Den**.

# Den.

*Den is your noise barrier, acoustically enhanced to separate you from the hubbub of the workplace. Den can have power, reading lights and data connectivity. Worktops can be positioned to suit your working style, and soft seating can make your Den a comfortable retreat.*

## *Unique economical construction*

**Den's** unique junction system enables numerous configurations to be constructed with shared components, unlike other acoustic work systems which extend their configurations by placing stand-alone units back-to-back. **Den's** modular design ensures an economical construction, which can be easily extended and reconfigured to suit your changing needs.

## *Acoustics*

**Den** is an acoustically enhanced product designed to reduce noise and distractions. The acoustic performance of the panel construction has been independently tested in an acoustics research laboratory following the guidelines found in BS EN ISO 354:2003 (Acoustics - Measurement of sound absorption in a reverberation room).

A full acoustic testing report is available on our website [www.oceefolio.com](http://www.oceefolio.com)

## *Finishes*

A wide range of finishes enhances **Den's** flexibility. Both plain and quilted fabrics are available with a silver or black trim line. Panels can be chosen in matching or contrasting fabrics depending on your design.

The worktops are available in Maple, White, Cherry, Walnut and Oak with a matching edge or contrasting ply or black edge. A chunky 43mm worktop is offered along with a 25mm and a chamfered 12mm.

# Den.Honeycomb

Den.Honeycomb 1350mm high and 1950mm modular width, four person workstation, shown in Camira Blazer Ulster and Silverdale with FourCast One chairs.

Den.Honeycomb 1350mm high and 1950mm modular width, four person workstation, shown in Camira Blazer Dunhurst and Kingsmead with FourCast One chairs.

# Den.Panel

Den.Panel has been created to offer free-standing acoustic panels to complement your Den configurations. A newly designed discreet foot neatly supports the panel without creating any trip hazards or extending the overall footprint. Both a full circle and semi-circle option are available to cater for specific needs.

Den.Panel 1500mm high 850mm modular width with stabiliser feet, shown in Camira Blazer Ulster.

# Den.Specials

The joy of creating such a flexible system is that we can create a Den to match your specific needs.

The Den team will be delighted to help you and can provide a free 3D space planning service and a detailed quotation.

### Panel stabilising feet options

- Stabiliser foot
- Half stabiliser foot
- Slide-on fixed foot

### Height option

- 1500mm

### Modular width options

- 650mm
- 850mm
- 1050mm

### Example Configurations (mm)

#### 850 Modular Width
