

Harmony power module

Harmony is a versatile desk power solution, specifically designed to meet the increasing power and everyday communication needs of a working office. The Harmony features integral fuses which are fully compliant to current safety regulations and is configured with segregated power & data choices to suit different workstation requirements. Harmony can be used in conjunction with our under desk modules to provide greater power solutions and is fitted to the edge of desk with 'C' clamps or adhesive kit making it functional yet non-intrusive to the working desk.

- Anodised aluminium extruded body
- Choice of Black, Grey or White fascias/end caps
- Fully segregated power and data
- All UK sockets feature integral fuses. Choice of 3.15A or 5A fuses are available to comply with BS 6396:2008
- All standard options are supplied with a 1m mains lead to male 3 pole connector. Requires a separate mains lead if passing from a 13A socket
- Data leads are supplied at a standard length of 3 metres
- Tested to comply BS 5733
- Will accept Category 6 data sockets if specified
- Fixing via standard 'C' clamps or adhesive fixing kit

Manage your energy

Configure Harmony to allow energy to be monitored and controlled with Footprint. See page 89 for more details.

NB CMD cannot accept any responsibility or liability for providing category 5e performance in products supplied. We will however fit category 5e specification components where specified.

Note: Fuses only accessible after removal of equipment plug. Lead lengths shown will be the conductor length and not the distance from the end of the module to the plug. For example, a 3m prewired power lead will be approximately 2.875m as 125mm will be internal for the termination, this is also applicable for data leads.

Data fascias may be subject to colour change.
