

# FITTING INSTRUCTIONS

## DOES IT FIT?

Please can you measure before opening the pack

general seat dimensions

max/min fixing adjustment

Please read carefully before attempting to fit the seat. If you are not the end user, please make sure the aftercare instructions are made available to the end user to read.

## Parts Diagram

Depending upon style of toilet pan, you can choose one of five positions for the fixing bolt. This allows:

- Adjustment for correct distance between fixing bolts
- Forward and backward adjustment

## Assembly Diagram

## Attaching Your Toilet Seat

1. Place the main seat washers on to the hinge plates, and feed the fixing bolts through the holes in the toilet pan in the desired position.
2. Fit the rubber washer, metal washer and fixing nut as shown in the assembly diagram.
3. Secure the fixing nuts very firmly using a spanner or pliers (not supplied). Care must be taken not to over tighten the nuts as this could result in damage to the toilet pan.
4. After a few days use check the nuts are still tight. This is necessary as the rubber washers will compress during the first few days.

## AFTERCARE

Clean surfaces with a soft damp cloth and mild soap solution

Do not scrub or scour

Do not use bleach, abrasive or corrosive cleaning agents

Do not stand on the lid or ring of your toilet seat

If using bleach, abrasive or corrosive cleaning agents inside the toilet bowl, ensure that these do not come into contact with the seat. Keep the seat in the upright position until all cleaner has been flushed away.
