

## INSPIRING TAPS

Taps are no longer just a minor detail. They're the finishing touch, lifting your bathroom from the mundane to the truly special. The right taps must combine the two key ingredients of design and functionality - in short, they must look good and they must work well. With that in mind, we have designed a range of taps which really shine.

NEW FOR 2014

## STRIKE FEATURES

---

### **Low pressure**

Suitable for all plumbing systems including conventional gravity fed systems and will operate at 0.2bar or above.

### **Lever action**

The single lever action makes the Strike basin mixer extremely easy and practical to use.

### **Ceramic cartridge technology**

Smooth, easy to use action giving accurate flow control.

### **5 year guarantee**

Our taps are manufactured in a closely controlled environment with extensive quality control tests carried out. It is this attention to detail that allows us to confidently offer all of our taps with a 5 year guarantee.

# STRIKE

Strike's **TAPERED** body is echoed in its slim lever handle to create a simple yet **DISCERNING** look for your bathroom. Sure to be the next design classic.

# WASTES AND TRAP

Our tap ranges are perfectly complemented by our stylish and modern chrome plated bottle trap and collection of wastes. All bath taps are supplied without wastes as it is usual to purchase your waste with your bath. We have a choice of bath wastes with overflow in 2 different lengths depending upon your installation requirements.

Taps supplied with a pop-up waste include a waste outlet, pop-up rod and lifting mechanism. Please note that Strike, Melody, Voice, Q60, Hype, Kick, Lift, Blaze, Siren, Index and Logic mini and basin mixers are supplied with a click waste. For taps supplied without pop-up wastes, we have a few waste options as shown. Unslotted wastes are for use where no integral overflow is required in the wash basin.

## WASTES AND TRAP PRODUCT INFORMATION

	Product	Code	RRP inc VAT
1	65mm Unslotted Click Waste	WASTE6	£12.47
2	65mm Slotted Click Waste	WASTE7	£12.47

9	Pop-Up Cable Bath Waste & Overflow (1020mm hose)	WASTE30	£36.45

# DESIGN DETAIL

## Tap Operating Pressure

Plumbing systems can sometimes suffer from poor flow rates. The UK is unique in that many homes are still using the more traditional, low pressure gravity fed plumbing systems which are most commonly found in older properties.

European manufacturers tend to design taps suitable for more modern plumbing systems which can often cause problems when installed in a typical UK home, resulting in a disappointing flow rate when using the taps.

Tavistock's in-house design team have recognised this problem and engineered our taps so that all of them are suitable for use with both high and low pressure systems.

Most of our taps operate at 0.1bar or above (0.1bar is equal to 1 metre head of water). In plumbing terms this means, for a gravity fed system, if the base height of your water tank is 1m above a tap, then you will have 0.1bar of water pressure at the tap.

If you are unsure, we recommend you seek advice from your plumber who will advise you on the plumbing system you have and the likely water pressures it can achieve. If pressures are too low even for our low pressure taps, you will be able to increase your water pressure using a suitable water pump, and again either your retailer or plumber can advise you on this. Please note that all of our taps are also suitable for high pressure plumbing systems.
