

A dedicated range of privacy and shower curtains with a primary infection control focus, providing an all-encompassing solution to increase levels of dignity.

YewdaleHarrier® The Cubicle and Shower Curtain Range

A dedicated range of privacy and shower curtains with a primary infection control focus, providing an all-encompassing solution to increase levels of dignity.

When it comes to providing privacy, dignity and safety in hospitals, YewdaleHarrier® fabric and disposable curtains are on hand to help. Their anti-bacterial, flame retardant and ready-made properties are developed with both the patient and staff in mind, so rest-assured, you're in safe hands with Yewdale.

see things differently

Anti-bacterial

Infection control capabilities but not compromising on the quality and choice, YewdaleHarrier® curtains are made with hospitals in mind. Our fabric curtains can be washed at high temperatures, and our disposable curtains are easily discarded and replaced to minimise the risk of infection and reduction of patient privacy.

Ready-made

We manufacture our cubicle curtains ourselves which makes maintaining a stock easy. Therefore, we are able to dispatch your curtains quickly, removing the delay and the uncertainty that often comes with ordering, and waiting for your ward's curtains to arrive. YewdaleHarrier® takes hassle out of ordering curtains.

The Full Range YewdaleHarrier®

Ready-made Cubicle Curtains

Flame retardant, double-sided machine washable cubicle curtains.

Disposable Cubicle Curtains

100% recyclable, anti-bacterial polypropylene curtains.

Shower Curtains

Ready-made, flame retardant shower curtain range.

CUBICLE AND SHOWER CURTAINS

YewdaleHarrier® Cubicle and Shower Curtains

The YewdaleHarrier®
concept: ready made
cubicle curtains and shower
curtains from stock.

A simple idea that removes at a stroke the biggest problem with hospital cubicle curtains - delay! The time constraints between choosing curtains; choosing a colourway; making-up; and hanging the curtains, lead inevitably to uncertainty and the very real risk of things going wrong. Harrier will dramatically improve this scenario.

All YewdaleHarrier® standard products are available from stock, for immediate dispatch. This means that new installations or refurbishments on a short timescale (as is so often the case) are not held up by the final item to go in.

On working wards, the emphasis on infection control means that curtains often have to be changed at short notice - so spare sets must be immediately to hand. This is leading to a complete reappraisal of the curtain stock situation - and YewdaleHarrier®, with its standard sizing and off-the-shelf capability is proving to be the answer.

YewdaleHarrier® ready-made cubicle curtains from stock

- Traditionally made
- Standard sizes from stock
- Three colour choices
- Inherently flame retardant
- Washability to NHS standards

YewdaleHarrier® ready-made cubicle curtains are available from stock, for immediate dispatch. With a curtain drop of 2030mm they will fit in perfectly with the standard cubicle track height of 2100mm from floor level. Four different widths of curtain are offered, allowing almost any size of cubicle track to be accommodated. YewdaleHarrier® curtains are stocked in four attractive colourways: Meadow, Sky, Russet and Fawn, to allow coordination with most existing colour schemes.

Traditionally made fabric curtains:

The curtains are manufactured from high quality, inherently flame-retardant, 220gsm polyester fabric. They are traditionally made, with sewn side and bottom hems, and 25mm flame-retardant heading tape. They are fully compliant with hospital hygiene standards and are able to withstand repeated washing at high temperatures.

Infection control:

With the growing importance of infection control policy, it is imperative that a regular programme of curtain changing is maintained. But in addition to this, there will always be the emergency scenario where curtains have been soiled and become an immediate infection risk. The requirement for patient privacy means that soiled curtains must be replaced promptly when they have been taken down for washing. It is in this situation that a stock of standard sized YewdaleHarrier® curtains are invaluable.

All YewdaleHarrier® products are available through a nationwide network of distributors / customers, with experienced installation and service teams providing an unrivalled level of support.

Size Limitations

Size	For track length	Meadow	Russet	Fawn
2900 x 2030mm	2900 x 2030mm	ME2	RU2	FA2
4350 x 2030mm	4350 x 2030mm	ME3	RU3	FA3
5800 x 2030mm	5800 x 2030mm	ME4	RU4	FA4
7250 x 2030mm	7250 x 2030mm	ME5	RU5	FA5

All curtains are 2030mm curtain drop. Track sizes shown include 20% curtain fullness. Other sizes available by request, eg. for window curtains.

YewdaleHarrier® Disposable Cubicle Curtains

YewdaleHarrier® disposable cubicle curtains

Infection control:

One of the most important aspects of the hospital environment is infection control. It is now a major factor in the assessment of a hospital's performance and rightly so, as any improvements in infection control can cause an immediate increase in the number of lives saved. And as risk of infection is reduced, the quality of life for patients is enhanced. YewdaleHarrier® disposable curtains should become an integral part of every hospital's overall infection control strategy. A programme of regular replacement can be augmented by a policy of immediate change in any areas that have been exposed to high infection risk.

Recyclable and anti-bacterial:

The curtains are manufactured from 100% recyclable polypropylene and are treated with Biosafe® antibacterial formulation. It has proved to be extremely effective, in both in anti-microbial activity and in creating a zone of inhibition around the fabric. The test results are available on request.

Enhanced quality of life for patients and staff:

Conventional curtains that have been through many wash cycles soon begin to look worn and tired. YewdaleHarrier® disposable curtains will always look fresh and new - because they are! The curtains are permanently pleated as part of the manufacturing process, which ensures that they will always stack neatly, and close to the wall, giving the ward a bright and orderly appearance at all times.

DPL4 with Movaglide - the simple solution:

YewdaleHarrier® DPL4 disposable curtains with easy-load gliders are available from stock in four attractive colours as shown below, with a 2m curtain drop. Each curtain will fit a track length of up to 5.75m, and the curtains may be cut down in both width and drop. They are flame-retardant to BS5867 Part 21980 Type C.

DPL3 with eyelets:

YewdaleHarrier® disposable curtains are also available with eyelets to fit existing cubicle track glider hooks. This version is stocked in sky blue only, and will fit almost all makes of glider hooks or roller hooks. All YewdaleHarrier® products are available through a nationwide network of distributors / customers, with experienced service teams providing an unrivalled level of support.
